# Prompting Techniques: RGC

The RGC prompting technique is an abbreviation of Role, Granularity, and Context. Here is how RGC works.

Assign a role to the LLM. For instance, if you want to learn about recipes, assign a chef's role to the LLM.

Add granularity to your prompts by explaining the ask in detail.

Set boundaries within which the LLM should work.

Here are a couple of prompts that you can modify as per the requirement.

1. Consider that you are an established sales representative specializing in reselling computers. I need ten ideas for an elevator pitch. Include details on how I can begin a conversation and make them memorable.
2. Consider that you are a popular life coach and TED talk provider. Give me three great one-liners to motivate my team. Remember they should be empathetic, energetic, and witty.
